

movies		
	movie_id	binary
	title	varchar(255)
	description	varchar(1200)
	release_year	date
	movie_length	integer

ticket		
	ticket_id	integer
	film_id	integer

customer		
	customer_id	integer
	ticket_id	integer
	concession_id	integer

We started with making our four tables with their own ID's that we put as a primary key, then we added other information we thought was necessary. We linked them based on intuition, and logic.
